I'm an aspiring software engineer with a background in BCom, now fully dedicated to the world of tech. My journey from commerce to coding is a testament to my commitment to growth, learning, and embracing change whenever necessary. Whether I'm tackling a complex coding challenge or exploring new technologies, I'm always eager to expand my knowledge and skills.

Beyond the technical side, I try to bring a joyful spirit to every environment I occupy. I believe that spreading positivity and joy not only enhances my own experience but also enriches the experiences of those around me.

Skills

- Problem solving
- Teamwork
- Presentation skills
- Python
- Java

Work History

Sep 2024 - Dec 2024 **Technical Mentor**

WeThinkCode_, Johannesburg

- Supported my mentees through their technical learning journey, dedicating at least 4 hours a week to motivating them and fostering a collaborative environment.
- Initiated and guided them through one-on-ones, workshops, retrospectives and Pecha Kuchas.
- Enhanced development through regular assessments and exercises.
- Offered constructive feedback on mentee progress, enabling them to refine their skills and enhance their potential.
- Provided guidance and recommended coping mechanisms for mentees dealing with difficult issues.

- I balanced this role with my second-year coursework, maintaining a good academic performance.
